

AVICINA Cumin oral drop TS

Carminative / Weight reduction supplement

Effective management of overweight seems to be of utmost importance especially if modern science can utilize safe effective plants.

Abdominal obesity is associated with high plasma triglyceride (TG) and with low plasma high density lipoprotein (HDL)-cholesterol (CHOL) levels.

Flatulence is the passage of intestinal gas (flatus) through the rectum. Passing gas is normal, and every human being does it at least 14 times a day, consciously or unconsciously. Sometimes flatulence happens more often than expected, and this can become an embarrassing problem.

Widely popular for their distinctive savory flavor, cumin seeds are one of the routinely featuring ingredients in the North African, Middle-East, Western Chinese, Indian, Cuban and North Mexican cuisine. The spice is native to the Middle-East Asian region, and today, grown all over the world for its pleasantly aromatic seeds.

AVICINA Cumin oral drop, the 100% natural essential oil gained from "*Cuminum cyminum*" is carminative, reduces appetite, and improves digestion by relieving digestive symptoms such as pain, spasm, gas and dyspepsia. It has also been acknowledged to have weight reduction effects and stomach-calming effects to improve digestion and regulate appetite.

It has the highest quality because the precisely selected seeds are cultivated in our farms, monitored every day and are raised under the most proper conditions. After the harvest, it goes through the extraction process which is carefully designed to ensure the maximum effectiveness and most benefit. Finally, a natural emulsifier turns it into a water soluble drop that significantly improves the absorption.

Directions: Three times a day, mix 3 to 5 drops in a cup of water or juice, and drink.

Note:

- Cumin should not be used during pregnancy.
- Keep out of reach of children.
