

AVICINA Dill

Oral drop

Lipid-lowering

Dill is native to southern Russia, western Africa and the Mediterranean region. It has been used for its culinary and medicinal properties for millennia. Dill was mentioned both in the Bible and in ancient Egyptian writings. It was popular in the ancient Greek and Roman cultures, where it was considered a sign of wealth and was revered for its many healing properties. Dill was used by Hippocrates, the father of medicine, in a recipe for cleaning the mouth. Ancient soldiers would apply burnt dill seeds to their wounds to promote healing.

The curative properties of dill have been honored throughout history. The Conqueror Charlemagne even made it available on his banquet tables, so his guests who indulged too much could benefit from its carminative properties.

And today, based on latest scientific evidence and modern herbal pharmacopoeia references, Avicina Dill oral drop, containing the active substance carvone, is being advised mostly as a lipid-lowering herbal medicine, besides other known benefits of dill through history.

*

AVICINA Dill oral drop, the 100% natural essential oil, functions as a hypolipidemic (lipid-lowering) herbal medicine. It is gained from "*Anethum graveolens*", as the precisely selected seeds are cultivated in our farms, monitored every day and are raised under the most proper conditions. After the harvest, it goes through the extraction process which is carefully designed to ensure the maximum effectiveness and most benefit. Finally, a natural emulsifier turns it into a water soluble drop that significantly improves the absorption.

Directions: Three times a day, mix 3 to 5 drops in a cup of water or juice, and drink.

Notes:

- **Dill oral drop** should not be used during pregnancy.
- Keep out of reach of children.
