

## **ayicína<sup>®</sup> Myrtle**

### **Topical Liquid for Shingles (herpes zoster) & Acne Care**

Shingles (herpes zoster) is a viral infection that may cause pain, burning, or a tingling sensation on either the left or right side of the body. It consists of red patches of skin with small blisters that look very similar to early chickenpox. Shingles usually clears in 2 to 3 weeks and rarely recurs.

**ayicína<sup>®</sup> Myrtle** topical liquid is a pure herbal essential oil produced of *Myrtus communis* which helps to treat Shingles and Acne without any side effects. Natural active substances of Myrtle have strong inhibitory effects on shingles and prevent pain, complications and shorter the course of the disease. Apply this solution twice a day with a cotton ball on the affected area (blistering skin rash). For shingles care, after 5 minutes pour baby powder on those areas.

#### Notes:

- In case of allergic rash, wash with cold water and soap.
- Use this product topically, don't take it.
