

ayicinda Saffron oral drop TS

Antidepressant/ Cancer preventer/ Sexual enhancer

- Depression refers to feeling sad and depressed for weeks or months on. This feeling is most often accompanied by feelings of hopelessness, a lack of energy, insomnia or excessive sleeping, changes in appetite, agitation or restlessness and taking little or no pleasure in things that gave you joy in the past. In its mildest form, depression doesn't stop leading normal life, but makes everything harder to do. At its most severe, major depression can be life-threatening, because it can make the person feel suicidal.
- Cancer is a broad range of diseases in which cells divide uncontrollably, form malignant tumor and even in final stage spread to other parts of the body.
- Premenstrual syndrome (PMS) is a group of physical, psychological and behavioral symptoms that can occur before a woman's monthly period.
