

ayicína Thyme spray

Anti Aphthous Mouth spray

Aphthous stomatitis is a common cause of benign and non-contagious mouth ulcers that occurs as small, shallow lesions developed on the soft tissues in the mouth or at the base of the gums. These ulcers that occur periodically and heal completely between attacks can have symptoms ranging from a minor nuisance to interfering with eating and drinking.

ayicína Thyme Spray is a herbal essential oil produced from “*Thymus vulgaris*” which speeds up healing of aphthous and has not any side effects.

Active substances of thyme with having antiseptic (antibacterial, anti-fungi and anti-viral) properties can be used as an anti-aphthous and mouth antiseptic.

Spray this solution into the mouth, several times a day.

Notes:

- Keep out of reach of children.
